Equity Market April'11 Review

The KSE 100 Index gained 248 points or 2.1% MoM in Apr'11 to close at 12,058 points on Apr30'11. Out of this increase, almost 175 points were contributed by OGDC alone. Overall market performance remained lackluster as gains were primarily driven by index-heavyweight OGDC and volumes only briefly spiked on sporadic activity witnessed on specific results such as LOTPTA and PTC. Total market volumes were recorded at 1.58bn shares, down 28.5% MoM.

Healthcare, Beverages, Construction and Food Producers, were the major sectors with positive price performance. Bank, E&Ps and fertilizers showed relatively robust corporate earnings. However, In general, the KSE's response to this growth in earnings was subdued due to taxation concerns over the FY12 Budget.

Because of revenue generation measures initiated by government, which includes 15% flood surcharge, effective from 15th March to 30th June 2011 and removal of GST exemptions on a number of items, corporate profitability is expected to cut marginally in 2Q11 as companies bear the brunt of this flood tax. Even the profits for FY12 could have an impact of these measures in Federal Budget (in end May). As for the increase in corporate tax rates which is currently being discussed, banks are expected to be most at risk of this tax.
