## An Investment Guide to Mutual Funds

### Investment Highlights

#### Industry Update

Overall open-ended industry, excluding NIT(LOC), showed considerable growth in Jan10. MCB, ABL, Arif Habib and Al-Meezan together contributed 67% to the total inflows recorded during the month. During Mar10, Arif Habib Investments and MCB Asset Management announced to enter into discussion to consider a possible merger of two entities. Subject to regulatory approvals, negotiations between the two companies will commence and swap ratio worked out. This merged entity will have PKR 24.9bn of Assets under Management.

#### Investment Strategy

Overall income fund returns showed vast improvement during Feb10 with annualized returns averaging 7.6% versus 3.0% in Jan10. Feb10 return range narrowed to sit between -28.0% and 19.1%. We believe investors placing funds for greater than a 12mo tenor are likely to yield greater returns from income funds. Our preferred income funds are FSGF, IGI IF and PIEF. However with interest rate uncertainty emerging, we recommend investors placing funds for a short tenor should invest in highly liquid cash funds in order to avoid the volatility associated with longer tenor debt instruments.

#### Fund of the Month: Faysal Savings Growth Fund

FSGF has shown consistent performance and enjoys a low standard deviation of 0.02 for a trailing 12mo period. As of end Jan10 the fund had a 4.5% TFC allocation of mainly banking sector TFCs. The fund's strategy is to actively trade TFCs. The practice of holding TFCs for a shorter tenor tends to insulate the fund from the volatility arising in TFC prices. As of end Jan10 the fund had maintained 95.1% of net assets in bank deposits and money market placements. In our view this strategy will help mitigate interest rate risk as well as allowing greater flexibility in the current uncertain interest rate climate.

## Industry Update

Open ended industry AUM reduced by 4% MoM to PKR 183bn during Jan10. Of the total redemptions recorded in 8 AMCs, NIT stands out to show the biggest (net) outflow of PKR 16.9bn on account of huge redemption of PKR 18.32bn in its NI(U)T (LOC) Fund. The unit holders of NI(U)T (LOC) had been given the Letter of Comfort by Govt. of Pakistan and after Dec10 major portion of the portfolio of securities has been transferred to respective unit holders. However NIT (GBF) grew by 1.32bn with AMC AUM standing at PKR44bn.

Overall open-ended industry, excluding NIT(LOC), showed considerable growth in Jan10. MCB, ABL, Arif Habib and Al-Meezan together contributed 67% to the total inflows recorded during the month. MCB Cash Management Optimizer Fund registered growth of PKR2.2bn increasing AMC AUM by 21% to PKR14bn making it the third largest AMC. Fund size of ABL AMC also increased by 25% to PKR10bn owing to a huge inflow of PKR2bn in its income fund. Inflow of PKR1.14bn in Meezan Cash Fund took AMC AUM to PKR13.8bn. Arif Habib Investments grew by 13.7% MoM to PKR 10.9bn owing to a collective inflow of PKR1.57bn in PCMF and PIF.

During Mar10, Arif Habib Investments and MCB Asset Management announced to enter into discussion to consider a possible merger of two entities. Subject to regulatory approvals, negotiations between the two companies will commence and SWAP ratio worked out. This merged entity will have PKR 24.9bn of Assets under Management.

During the month numerous news reports emerged regarding imposition of capital gains tax in upcoming FY11 budget, details are still sketchy with industry participants awaiting clarifications on the securities expected to fall in the tax net and modalities.

## Income Funds

### Money Market & Fixed Income Update

Money market remained stiff across the month. The Central bank continues to conduct Open Market Operations and injects an average amount of PKR 100bn every week to ease off the market. Treasury bills rates witnessed a significant rise in each of the two auctions conducted by SBP during Feb10. Cut-off yields on 3m, 6m & 12m increased by 5bps, 16bps & 9bps in first auction and by another 28bps, 23bps and 24bps in the last auction to 12.19%, 12.28% and 12.34% respectively. The second consecutive increase in t-bill rates reflects government's effort to deal with the rising inflation by further tightening of the monetary management. However, after witnessing a radical increase in the auctions, T-bill rates in secondary market appeared to slip back with 3m recorded to trade at 12.05%, 6m at 12.15% and 12m at 12.27% by the end of Feb10. On the other hand, the longer end of the yield curve, on the back of higher expectations in inflation figures as compared to dec09, continues to lift up with 10yr PIB observed to trade at 12.69%, i.e. 15 bps higher than the cut off, in the secondary market by end Feb10. 6mo KIBOR also shifted upwards to 12.43%, 45bps up MoM.

### Trading on BATS remains lackluster

Around PKR2.1bn worth TFCs trades were conducted during Feb10 with not a single trade traced on BATS. UBL TFC-IV, Engro TFC-III and NIB TFC remained the volume leaders with trade volumes of PKR602mn, PKR296mn and PKR148mn respectively. An average return (YTM) of 16.53% was observed on the prices of TFCs traded during the month, whereas most of the trades were done at prices that offered a yield in the range of 14% to 18%.

### Average returns

Overall income fund returns showed vast improvement during Feb10 with annualized returns averaging 7.6% versus 3.0% in Jan10. Feb10 return range narrowed to sit between -28.0% and 19.1%. For the month of Feb10, DMMF returned the highest at 19.1% followed by HBL IF and CPF at 12.9% and 12.6% respectively. As of end Jan10 fund TFC allocation for each of the three aforementioned top performers was in excess of 40.0%. During 8mo FY10 annualized returns for the category averaged 7.8%. NAMCO IF topped at 15.7% followed by PIF at 15.0% and BMA CRSF at 14.5%. For 12mo the top performers were BMA CRSF, PIF and NAMCO IF at 17.0%, 15.6% and 14.5% respectively with the category averaging 10.1%.

### No (0%) TFC exposure

We now categorize MB PSF in the Money Market/Government Security funds leaving just ABL IF in the no TFC exposure sub-category. ABL IF delivered 10.6% during Feb10 with returns for 8mo FY10 and 12mo standing at 11.2% and 11.7% respectively.

### Low to Medium (1-39%) TFC exposure

During Feb10 the top performing fund in the category was FSGF at 11.9%. JS IF and IGI IF trailed not too far behind at 11.6% and 11.1% with sub-category returns averaging 8.8%. TFC weight for the sub category stood at 16.6%. During 8mo FY10 NAMCO IF showed strong performance at 15.7% followed by PIEF at 14.4% and FIGF at 13.2% with category returns averaging 12.4%. The top performing funds for 12mo were NAMCO IF at 14.5%, PIEF at 14.2% and JS IF at 13.6%. Category returns averaged 13.0%. We highlight that even while it is categorized as fixed income, FIGF fund had a 5.9% equity allocation as of end Jan10.

Our preferred funds in this category are FSGF, IGI IF and PIEF. We like FSGF and IGI IF on account of consistent performance and low standard deviation. We highlight that both funds actively trade TFCs but do not hold the asset class for a long tenor. PIEF on the other hand tends to show some volatility on account of its sizable TFC portfolio (39.2% of Net Assets). However the fund is invested in good quality instruments and portfolio credit quality stands at AA+. In our view investments in PIEF with a 12mo investment horizon are likely to yield good returns.

## Islamic Income Funds

### Average returns

Overall average returns for Islamic income fund delivered in the negative during Feb10 at -1.1% largely on account of NAFA ISIF and KASB ISIF dismal Feb10 return of -10.1% and -23.3% respectively. Returns for 8mo FY10 and 12mo averaged -2.7% and 2.0% respectively.

### Fund performance

### Portfolio allocation

Islamic income funds sukuk allocation (including GoP backed and Ijara Sukuk) decreased to average 51.8% during Jan10. The heavy sukuk allocation is the underlying reason behind volatile Islamic income fund returns. United ISIF, NAFA ISIF and KASB ISIF maintained highest exposure to the highly illiquid asset class while Atlas ISIF remained the only fund with zero exposure to Sukuks. Cash and equivalents averaged 24.6% for the category with PO AISIF maintaining highest cash allocation at 65.5% during the month.

# Money Market & Govt. Security Funds

## Average returns

Feb10 average returns for Money Market and Government Security Funds stood at 9.7%. Returns for 8mo FY10 averaged 10.3% while only two funds in the category had a 12mo return history averaging 11.7%. We believe Money Market and Government Security Funds are suitable for investors wishing to park their money for a short time frame. While some volatility can be witnessed in Government Security Funds owing to investments in asset classes of longer tenors, standard deviation remains extremely low in Money Market Funds. We have removed FSGF from this category owing to its TFC allocation and include MB PSF in this category.

## Fund performance

PCMF took the lead in Feb10 at 10.9% followed by NAFA GSLF and Meezan CF at 10.4% and 10.1%. For 8mo FY10 PCMF retained top spot at 11.2% followed by NAFA GSLF and ULPF 10.5% and 10.4%. Only two funds in the category have a 12mo history and they are MB PSF and PCMF at 12.1% and 11.3% respectively.

## Equity market Feb10 review

The benchmark KSE 100 Index gained a mere 0.5% during Feb10 to close the month at 9,658 points with market volume shrinking MoM by 12.6% to 157.9mn shares. Net foreign portfolio investment remained subdued during Feb10 at USD 16.7mn.

Feb10 was a lackluster month for KSE. While volumes remained thin and skewed largely towards second tier scrips, index performance was marred by news of capital gains tax imposition effective July 1st 2010 and resignation of the Finance Minister. Corporate results largely failed to spark excitement for the benchmark.

Going forward we believe the index crossing the 10,000 level is likely to be influenced by the following factors 1) monetary policy statement in end Mar10 2) news reports regarding FY11 budget 3) development of a margin financing product and 4) foreign flows.

Policy makers will have to ensure that focus remains on macro economics. The Central Bank's last policy response in the form of maintaining status quo in discount rate primarily hinged on the anticipated increase in headline inflation and any spiral impact of hike in energy tariff. While inflation CPI for Feb10 came in at 10% the central bank's ability to maintain a balance between the price level and much needed liquidity for growth in real activities will prove to be critical for the equity and fixed income market alike.

We maintain our preference towards funds that have shown a consistent performance, and a holding of blue chip scrips. We maintain our preference towards defensive plays in the power and fertilizer sectors.

### Company snapshot

Faysal Asset Management Limited (FAML) Faysal Asset Management Limited (FAML) is an asset management company was launched in 2003 within Faysal Bank Group. The company currently operated three open ended mutual funds.

### Fund objective

Faysal Savings Growth Fund (FSGF) seeks maximum preservation of capital and a reasonable rate of return via investing primarily in money market and debt securities having good credit rating and liquidity.

### Investment strategy

In line with its investment objectives, funds will be invested in a range of liquid money market and debt instruments. The investment portfolio will primarily comprise of PIB's, Bank Deposits, Treasury Bills, secured and unsecured listed or privately placed debt securities, Certificates of Investments, Spread Transactions and any other security or instruments that may be allowed by SECP.

### Performance drivers

FSGF has shown consistent performance and enjoys a low standard deviation of 0.02 for a trailing 12mo period. As of end Jan10 the fund had a 4.5% TFC allocation of mainly banking sector TFCs. The fund's strategy is to actively trade TFCs. The practice of holding TFCs for a shorter tenor tends to insulate the fund from the volatility arising in TFC prices. As of end Jan10 the fund had maintained 95.1% of net assets in bank deposits and money market placements. In our view this strategy will help in mitigating interest rate risk as well as allowing greater flexibility in the current uncertain interest rate climate.
